Service Letter No. SL-AG-32
April 20, 1964

SUBJECT: Change of Position of Ground Wire Attachment
To Ignition Switch (Bendix – Scintilla, Navy Type A-1a)

APPLICABILITY: S-2A, S-2B & S-2C models,
Serial No. 1002A thru 1201C

FAA APPROVED

In order to avoid the possibility of having a hot mag when the switch is in the "OFF" position it is recommended to change the ground wire attachment to the ignition switch. The following steps should be taken:

1. Dismount the ignition switch from the instrument panel (4 screws).
2. Open the housing by removing 2 nuts at the rear.
3. Disconnect ground wire at point B and attach under bolt as shown in sketch.
4. Close housing.
5. Reseal wire outlet hole with electrical tape.
6. Reconnect ignition switch in panel.
